60 King St

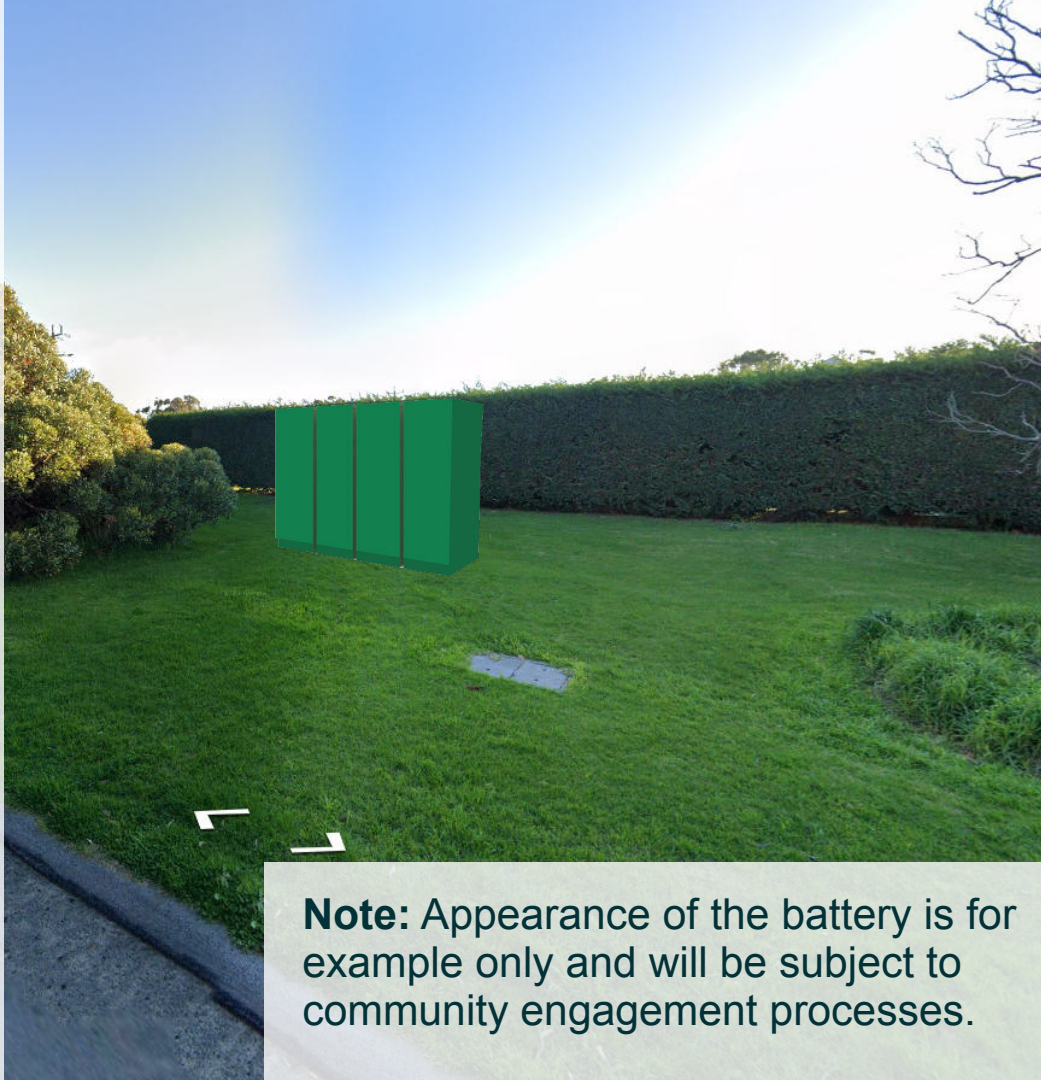
Pros

- Very high solar generation in area
- Battery could post-pone upgrades to the nearby electricity network
- Could make more revenue for the community fund
- Has potential to support an electric vehicle charger in the future

Cons

- Residential area
- Potential vegetation clearing
- Heritage listed property



Note: Appearance of the battery is for example only and will be subject to community engagement processes.

Note: Placement of the battery is for example only and will be subject to community engagement processes.

Note: Appearance of the battery is for example only and will be subject to community engagement processes.

62 King St

Pros

- Simple connection to power pole
- Very high solar generation in area
- Battery could post-pone upgrades to the nearby electricity network
- Could make more revenue for the community fund

Cons

- Residential area
- Vegetation clearing likely

Note: Placement of the battery is for example only and will be subject to community engagement processes.

Flinders Civic Hall

Pros

- Potential to support an electric vehicle charger in the future
- Minimal disruption to residents
- High visibility, supporting engagement on energy transition

Cons

- High visibility

Note: Appearance of the battery is for example only and will be subject to community engagement processes.
